

6. (New) A laminated material according to claim 4, wherein the top surface is polygon shaped.

7. (New) A laminated material according to claim 6, wherein the top surface is rectangular.

8. (New) A laminated material according to claim 6, wherein the top surface is square.

9. (New) A laminated material according to claim 4, wherein the top surface is formed from a top cellulose sheet having a visual pattern that imitates another product.

A
10. (New) A laminated material according to claim 9, wherein the top surface is mechanically formed with a surface texture that varies in accord with the visual pattern.

11. (New) A laminated material according to claim 10, wherein the top surface visually depicts wood.

12. (New) A laminated material according to claim 10, wherein the top surface visually depicts ceramic.

13. (New) A laminated material according to claim 10, wherein the top surface visually depicts stone.

14. (New) A laminated material according to claim 4, wherein the finished product is a board.

SUB
B2 → 15. (New) A laminated material according to claim 14, wherein the finished product is a floor board.

16. (New) A laminated material according to claim 4, wherein the finished product is a wall panel.

17. (New) A laminated material according to claim 4, wherein the finished product further includes side walls that extend down from said edge contours to a rim.

15. 18. (New) A laminated material according to claim 17, wherein the rim is formed by mechanical pressing.

19. (New) A laminated material according to claim 18, wherein the rim mates with another laminated material finished product.

SUB
B3 → 20. (New) A laminated material comprising cellulose sheets impregnated with a polymer resin that are pressed and cut to form a finished product, wherein that finished product includes a top surface formed from a top cellulose sheet having a visual pattern that imitates another product, and wherein the top surface is mechanically formed to have a surface texture that varies in accord with the visual pattern.
